SELECT * FROM dataset_clean;
```

Top 10 Profitable Products

```
SELECT product_name, SUM(profit) AS total_profit
```

```
FROM dataset_clean
```

```
GROUP BY product_name
```

```
ORDER BY total_profit DESC
```

```
LIMIT 10;
```

2. Top 10 Customers by Sales

```
SELECT customer_name, SUM(sales) AS total_sales
```

```
FROM dataset_clean
```

```
GROUP BY customer_name
```

```
ORDER BY total_sales DESC
```

```
LIMIT 10;
```

3. Region-wise Total Sales

```
SELECT region, SUM(sales) AS total_sales
```

```
FROM dataset_clean
```

```
GROUP BY region;
```

4. Category-wise Average Profit

```
SELECT category, AVG(profit) AS avg_profit
```

```
FROM dataset_clean
```

```
GROUP BY category;
```

5. Highest Discount Category

```
SELECT category, AVG(discount) AS avg_discount  
FROM dataset_clean  
GROUP BY category  
ORDER BY avg_discount DESC  
LIMIT 1;
```

6. Orders with Negative Profit

```
SELECT order_id, product_name, profit  
FROM dataset_clean  
WHERE profit < 0;
```

7. Monthly Sales Trend

```
SELECT MONTH(order_date) AS month,  
       SUM(sales) AS total_sales  
FROM dataset_clean  
GROUP BY MONTH(order_date)  
ORDER BY month;
```

8. Market-wise Revenue Analysis

```
SELECT market, SUM(sales) AS revenue  
FROM dataset_clean  
GROUP BY market  
ORDER BY revenue DESC;
```

9. Top-performing Sub-Categories

```
SELECT sub_category, SUM(profit) AS total_profit  
FROM dataset_clean
```

```
GROUP BY sub_category  
ORDER BY total_profit DESC;
```

10. Ship Mode Usage Analysis

```
SELECT ship_mode, COUNT(*) AS usage_count  
FROM dataset_clean  
GROUP BY ship_mode  
ORDER BY usage_count DESC;
```

Highest Revenue Market

SQL Query

```
SELECT market, SUM(sales) AS total_revenue  
FROM dataset_clean  
GROUP BY market  
ORDER BY total_revenue DESC;
```

Least Profitable Category

SQL Query

```
SELECT category, SUM(profit) AS total_profit  
FROM dataset_clean  
GROUP BY category  
ORDER BY total_profit ASC;
```

.Most Used Shipping Mode

SQL Query

```
SELECT ship_mode, COUNT(*) AS total_orders  
FROM dataset_clean  
GROUP BY ship_mode
```

```
ORDER BY total_orders DESC;
```

Top Profitable Products

SQL Query

```
SELECT product_name, SUM(profit) AS total_profit
```

```
FROM dataset_clean
```

```
GROUP BY product_name
```

```
ORDER BY total_profit DESC
```

```
LIMIT 10;
```

Loss-Making Products

```
SELECT product_name, profit
```

```
FROM dataset_clean
```

```
WHERE profit < 0;
```
